<u>Scrum</u>

PROJECT

IRCTC

Designed and implemented a comprehensive backend system for train ticket booking using REST APIs. Developed functionalities to manage train and user data, search and filter trains with pagination, book tickets with validation to enforce seating limits, and retrieve booking insights with seat availability. Ensured scalable architecture and robust error handling to improve user experience.

Movie Ticket Booking

Developed a robust backend system for movie ticket booking with integrated Twilio API for SMS notifications and Java Mail Sender for email confirmations. Implemented features to manage entity relationships, validate seat bookings, and track booked and vacant seats.

Blog Application, Food Order Application, ATM Simulator, Contact Application, Hospital management System & Task Manger.

EDUCATION

Bachelor of Technology

MLV textile & engineering college (7.52 CGPA) 2018-2022

Masters of Computer Application

Manipal university jaipur (8.42 CGPA till) 2023-2025
